

TRANSPARENT LCD SCREEN BENEFITS

HIGH RESOLUTION 1080P - WHITE=CLEAR

The unique display features of the transparent LCD screen showcase the product THROUGH the video playing in front of it.

With better color resolution, wider viewing angles and a high reliability, the transparent LCD screen with it's pure flat panel and ultra thin design will optimize and increase the amount of attention to your product!

Uses include:
Storefront product displays
Table tops / counters
Free-standing displays
Showcases

Potential benefits would include:

- Display your product behind something that would attract attention from the customer.
- Create awareness for the entire product line.
- Increase sales
- Interchangeable content
- Wide range of size options and custom display designs
